Minutes

Agenda item:	Reviewed Problem	Presenter:	Baris Senyurt
---------------------	------------------	-------------------	---------------

Discussion:

Should Marriot International deploy guest-facing AI in Singapore?

Conclusions:

As a group we have decided that Marriot International should deploy guest-facing AI in Singapore such as digital concierges, service robots, automated check-in/check-out systems

Action items	Person responsible	Deadline
✓ Research digital concierges	Brian Maina	11/21/2023
✓ Research service (Room)	Corey McPherson	11/21/2023
✓ Research automated check-in/check-out	Christine Olukere	11/21/2023
✓ Research service (Luggage)	Baris Senyurt	11/21/2023

Special notes:

Meeting notes 11/14/23

Marriott International is facing pressure to innovate and review the AI strategy for its hotel brands. Marriott is the second largest hospitality player in terms of market share in Singapore. The uptake of artificial intelligence (AI) among hospitality players in Singapore and growing consumer trust towards AI engagements over the past few years has created an impetus for Marriott to review its strategies. Government support as well as successful use cases of front-facing AI solutions such as chatbots (i.e., digital concierges), service robots, and automatic check-in/out systems, creates a favorable environment for Marriott to evaluate its next steps. Should Marriott deploy guest-facing AI in Singapore? If so, which AI solutions, and for which hotel brand, should be implemented?

Start at 6:25 What strategies could be employed to automate the concierge and check-in/check-out services? What would the Marriott look like with a fully integrated automated model? Service robots could be used for customer luggage and communication services.

Decided who works on what:

Brian - concierge service

Corey - Room service

Baris - luggage service

Christine - cleaning service
